

## Always ON Data Protection

Unlike traditional Backup solutions, the Consorte Appliance is Always ON and is always protecting your system's data. As the files are changed on your system the changes are instantaneously sent to Consorte Appliance. Its REAL TIME.

## No window of data loss

The Consorte Appliance ensures, you never have any data waiting for backup. No need to wait on evening and weekend backups.

## High Performance

Since only delta changes are sent from your machine to Consorte, the performance is significantly higher than traditional backups, where entire file is transferred.

## Single Click Restore

Recovering the data is truly a SINGLE CLICK job. Just choose the data you wish to restore, click restore and let the Consorte Appliance do the job.

## Plug-n-Play (Set it- Forget it)

Just power it on, connect it to the network, setup the computers to be protected one time and hand over the charge to Consorte.

## Easy Integration

Windows OS ensures seamless integration within the existing infrastructure.

## Multiple Versions

Consorte also maintains Current, a day old, a week old and a month old version of your data.

How often do you backup? Do you need to set aside time for backup? Is your last backup current enough? How much data would you loose, if corruption happens, between backups? How many hours do you put in to take backup? Do you know recovery could be time consuming and expensive, assuming it works? Did you wish there was a solution, which required you to set it once and took care of all your backup needs without you having to REMEMBER or having to do anything about it?

**Consorte!** - the realtime, zero click backup and one click restore appliance.

Consorte is a data continuity appliance that brings enterprise class real time backup, snapshot and restore like features to the small and medium business environment without compromising on data security. It is always ON and is backing up the data from all the computers on your network in real time, in the background. Recovering from data corruption or data loss is only one click away.

Consorte is a plug-n-play appliance. Just power it on, connect it to the network, setup the computers to be protected one time and hand over the charge to Consorte. Be reassured that your data is now being protected on a real time basis and is available in the event of any kind of disaster!

*“ Its truly amazing how easy it is to setup in less than 10 minutes. Thanks to Consorte, with my data being backed up in real time, I have no worries!”*

## Benefits

Features	Tape/CD/DVD	Disk based	Maxtor One Touch	Consorte
Protection always ON (Data is always backed up)	No	No	No	Yes
Real Time Protection	No	No	No	Yes
Rapid Recovery	No	Yes	Yes	Yes
High Performance	No	No	No	Yes
Protect Multiple Computers Simultaneously	No	No	No	Yes

## Consorte Offerings

Configurations	CS 200	CS 640	CS 1000
Form Factor	Desktop	1 U	1 U
Connectivity	Ethernet	Ethernet	Ethernet
RAID	N/A	RAID 5 (S/W)	RAID 5 (H/W)
Raw Capacity (GB)	200	640	1000
Network	1x100	1x100, 1x1000	2x1000

## **Features**

### **Going Beyond Backups**

Agglut Technologies introduces a revolutionary data protection appliance that removes the pains and overheads associated in protecting data. Data is the life stream of businesses and hence a loss less protection scheme with least amount of overheads in recovering the protected data for business usage is quintessential.

### **Providing Continuous protection**

Consorte Appliance is priced and built to provide the cost-effective and reliable data protection. It continuously captures data as it is written and immediately protects it. There is no need to take your applications or your servers down for backup. There is absolutely no need to REMEMBER to take backup. It's done REAL - TIME.

### **Single Click Rapid Recovery**

Recovering the data should be practically no work for the businesses, just a SINGLE MOUSE CLICK. That is the exact approach Agglut Technologies has taken in building this appliance. It ensures you get the data much faster as well.

### **Plug-n-play**

Agglut realizes the importance of "Keeping it Simple". The product is designed to be used by anyone who is just familiar with computers. It's Plug-n-play. Just power it on, connect it to the network, setup the computers to be protected one time and hand over the charge to Consorte.

### **High Performance**

All this comes without the slowness associated with traditional backup methods. Since only changed bytes are sent across to Consorte Appliance, the performance impact on your system is minimal. It DOES NOT send the entire file, as is done with traditional Backups. Its fast as it happens over network and is disk based.

### **Intelligent, Auto Sensing and Zero Touch**

Once your system is setup to be protected, you practically never have to intervene. If you take your system off the network and change some files, it is automatically synchronized and protection continues the moment it is brought back. A great feature for laptop users and people who telecommute.

### **Specialized implementation to protect MS SQL Server, MS Access and Microsoft Exchange**

Consorte Appliance have been carefully designed and developed to provide your SQL Server, Access and Exchange Server the much-needed protection without having to bring them down.

### **Consolidate Your Backup**

Instead of having multiple backups going on for various machines on your network, just let Consorte Appliance take over the protection at one place. Save the time of your administrators for useful purposes.

### **You control what to protect**

For advances users, Consorte provide the policy schemes, which can be set up in 2 minutes to control what gets protected and what is left out. So, you never have to worry about unwarranted files being backed up.
